

CS677-Spring2025 : Machine Learning

Assignment#4 - Total Points: 100

Due Date: 08/05/2025 (May 8th)

Sr.No	Questions	Points	Self-Assessment														
1	For given confusion matrix calculate precision, recall and f1 score(manual calculations based on formula shared in slides from week#8) <table border="1"> <tr> <td></td><th colspan="3">Actual value</th></tr> <tr> <th rowspan="3">Predicted value</th><th></th><th>Positive</th><th>Negative</th></tr> <tr> <th>Positive</th><td>TP 40</td><td>FP 20</td></tr> <tr> <th>Negative</th><td>FN 20</td><td>TN 910</td></tr> </table>		Actual value			Predicted value		Positive	Negative	Positive	TP 40	FP 20	Negative	FN 20	TN 910	35	
	Actual value																
Predicted value		Positive	Negative														
	Positive	TP 40	FP 20														
	Negative	FN 20	TN 910														
2	Given the Crash_reporting_Drivers_Data each Team has to try different algorithms for classification or regression as discussed. Please refer to examples from the link: https://scikit-learn.org/stable/supervised_learning.html	65															

Submission:

- Submit a Word document for problem 1 and a Python notebook for problem 2.
- Do not submit a zip file.
- You may not be graded full points if your submissions are not clear or unreadable.
- After the **Due Date**, late submission of up to one week will incur a 10% loss of total points earned. 5% every week thereafter until the **end date**.
